123insight is an award-winning system that is designed to address the flaws in traditional MRP/ERP system selection and implementation methods. Available since 2000, the system is provided on a low monthly subscription with no contract or penalties, and is supplied complete, not in modules. We publish transparent pricing on our website and offer regular, free 2½ hour Evaluation Workshops which are held across the UK, allowing you to check the suitability of our product. You can book staff on training courses at no risk – if you do not wish to continue just walk away. Only six days of training are needed. Rather than be drawn into a lengthy evaluation process that can really cost you significant amounts of time and money, many companies decide to try 123insight. Our risk-free approach allows you to be up and running with a minimum of fuss and financial outlay.

**Guy Amoroso,
managing director**

Company Profile

Offices: As above

Activities: 123insight eliminates the high risk of failure associated with traditional ERP/MRP systems, setting new standards in usability and capability. 123insight is provided on a no-commitment, monthly payment plan with no-obligation training, and covers all of your MRP, ERP and CRM requirements, including Sage and Pegasus interfaces and tight integration into Access Dimensions accounts software (also available from 123insight).

Dealers/VARS/Systems Integrators:

Principally direct but dealers and business alliances are being established across UK, Europe and the rest of the world.

Industrial Sectors

All manufacturing types, styles and sectors, including aerospace, automotive, engineering, electronics, textiles, food, medical, plastics, furniture, packaging, oil, water, defence, subcontract engineering, subcontract electronics.

User Profile

Customer profiles from 3 to 800+ personnel, with multiple factory/office locations and international, including project or contracts, one-off, small batch, high volume repetitive, make-to-stock, engineer-to-order and make-to-order, process, discrete, subcontract and capital equipment – and any combination.

User References

CSI, Corintech, Systech, DRM Industrial Fabrics, ANM Electronics, FisherCast, AGW Electronics, Butser Rubber, NIBSC, Jarvis Manufacturing, Canyon Europe, Image on Food, Global Invacom, Mantec, Cobra UK Automotive, Lascar Electronics, Cobra Design Centre, RH Technical Industries, Percival Aviation, Geotechnical, Bitbox, Polyseam.

Services

Industrial Standards: Microsoft .Net architecture; Windows XP/Vista/7/8; SQL databases.

Training & Support Facilities: Six days of training required on a no-obligation basis. You

only pay when proceeding with implementation. All training documentation provided in electronic format for easy, customer-driven downstream training. Fully inclusive telephone support, remote assistance and upgrades within the monthly payment plan.

Applications/Products

Manufacturing management: 123insight is an advanced manufacturing enterprise management system: a true .Net software application based on Microsoft's SQL, delivering simplicity for day-to-day operational use. It is everything that you would expect, from initial estimates and quotes, through sales and purchasing, full stock and manufacturing control, despatch, invoicing with accounts integration and interfacing options, plus CRM. CRM in 123insight terms is more than managing client or customer relationships; it is an entire 'communications' and 'workflow' capability that can streamline and control all business processes and procedures including stores scanning, service and repair capabilities and a cloud-based mobile function.

case study

Roke Manor Research, inventor of the Hawk-Eye ball tracking system based in Romsey, Hampshire, specialises in providing consultancy, product development, and solutions in sensors, information systems and communications. Expecting to grow the manufacturing side of the business, it decided in 2010 to implement an ERP system to replace Excel spreadsheets, Access databases and an

internally developed electronic route card system. Roke investigated systems costing over £150k plus £12k annual maintenance, and selected 123insight. Operations manager Steve Harris explained: "The financial case looked best for 123insight, but the clincher was very positive feedback from an established user in our industry." Since going live, Roke has integrated 123insight with its SAP R/3 financial

system and now uses 123insight's advanced serial tracking, provides aerospace-level traceability. As Harris concluded: "We can quickly see the status of any equipment and obtain the full history. This is a massive improvement. With 123insight we've been able to significantly reduce the upfront investment required, meaning that the breakeven point will occur much earlier."
