

At your service

As part of a recruitment drive that has seen the addition of five, new highly skilled service engineers, DMG Mori has announced that Martin Woodbridge has joined the company as installation manager and Neil Stuart as product manager, milling, for the North of England.

Mr Woodbridge has 10 years' experience with DMG and, after a three year absence from the

company, has re-joined DMG Mori to bring his expertise in the support of technically complex projects to the crucial role of machine installation. "With the amalgamation of DMG and Mori Seiki into DMG Mori, the volume of machine installations has accelerated considerably," he commented. "My objective is to bring a high level of professionalism to the installation process and deliver on and

exceed customer expectations."

Neil Stuart has been working with DMG machines for 16 years and will be bringing extensive milling experience to his new role. "Our customers have increasingly complex machining requirements, many of which lend themselves to 5-axis or integrated millturn solutions," he stated. "In a nutshell, my aim is to help our customers manufacture components

in the most productive and efficient way possible in terms of optimum cutting methodologies and machine and cutting tool selection."

Steve Finn, managing director of DMG Mori added: "We have a vast range of machinery at our disposal and our aim is to not only offer the ultimate in high quality machines, but also provide premier levels of service for our customers for the lifetime of the

Martin Woodbridge

equipment. These appointments will help us to achieve those objectives and deliver significant benefits to our clients."

MRP/ERP workshop dates announced

123insight has announced a series of Evaluation Workshops running across the UK in Q3 2014 for manufacturing companies looking to implement MRP/ERP.

These free to attend events not only show users effective methods of evaluating and implementing any ERP/MRP system, but also demonstrate the key benefits of the 123insight manufacturing enterprise management software, referencing many of the customers that have achieved

demonstrable savings. The dates are:

- 5th June: Renfrewshire Chamber of Commerce, Glasgow
- 12th June: Hethel Engineering Centre, Norwich
- 19th June: 123 Insight, Southampton
- 1st July: Wolverhampton Business Solutions Centre, Wolverhampton
- 10th July: Bewleys Hotel, Dublin
- 10th July: Adapt EMS, Hitchin
- 15th July: Teesside University, Darlington
- 17th July: 123 Insight,

- Southampton
 - 25th July: Belfast Metropolitan College, Belfast
 - 31st July: Renfrewshire Chamber of Commerce, Glasgow
 - 21st August: 123 Insight, Southampton
 - 2nd September: Wolverhampton Business Solutions Centre, Wolverhampton
 - 11th September: Adapt EMS, Hitchin
 - 18th September: 123 Insight, Southampton
- Each event starts at 10am and

runs for approximately 2.5 hours. Attendees are welcome to stay afterwards to discuss questions on a one to one basis.

Managing director, Guy Amoroso commented: "We've already seen phenomenal growth in the UK manufacturing sector in the first quarter of 2014. We doubled the number of new customers in Q1 over Q1 2013 and our website saw 137% growth over the same period. As a result we've squeezed in one more Evaluation Workshop over the 13 held in Q2 to ensure that we

have enough spaces available."

Once companies attend an Evaluation Workshop they can then go on to attend the no obligation six days of training which provides all the knowledge required to implement 123insight. If at this point they choose not to proceed with implementation, they can walk away at no cost.

Companies can register free via the company's website or by calling 01489 860851.
