123insight is an award-winning system designed to address the flaws in traditional MRP/ERP system selection and implementation methods. Available since 2000, the system is provided on a 'pay as you go' monthly subscription with no contract or penalties and is supplied complete, not in modules. The company publishes transparent pricing on its website and offers regular, free two-and-a-half hour Evaluation Workshops which are held across the UK, allowing you to check the suitability of the product. You can book staff on **no-obligation** training courses – if you do not wish to continue, just walk away. Only six days of training are needed. Rather than be drawn into a lengthy evaluation process that can really cost you significant amounts of time and money, many companies decide to try 123insight. The company's risk-free approach allows you to be up and running with a minimum of fuss and financial outlay.

managing director**

### Company Profile

**Offices:** As above

**Activities:** 123insight eliminates the high risk of failure associated with traditional ERP/MRP systems, setting new standards in usability and capability. 123insight is provided on a no-commitment, 'pay as you go' monthly subscription with no-obligation training, and covers all of your MRP, ERP and CRM requirements, including Sage and Pegasus interfaces and tight integration into Access Dimensions accounts software (also available from 123insight).

**Dealers/VARS/Systems Integrators:**

Principally direct, but dealers and business alliances are being established across UK, Europe and the rest of the world.

### Industrial Sectors

All manufacturing types, styles and sectors, including aerospace, automotive, engineering, electronics, textiles, food, medical, plastics, furniture, packaging, oil, water, defence, subcontract engineering and subcontract electronics.

### User Profile

Customer profiles from two to 800+ personnel, with multiple factory/office locations and international, including project or contracts, one-off, small batch, high volume repetitive, make-to-stock, engineer-to-order and make-to-order, process, discrete, subcontract and capital equipment – and any combination.

### User References

Eco-Burner, CT Production, CSI, Ovation, DRM Industrial Fabrics, ANM Electronics, DynaCast, AGW Electronics, Butser Rubber, NIBSC, Canyon Europe, Image on Food, Global Invacom, I M Kelly Rail, Percival Aviation, Geotechnical, Polyseam, Vortok.

### Services

**Industrial standards:** Microsoft .Net architecture; Windows Vista/7/8/10; SQL databases.

**Training & support facilities:** Six days of training required on a no-obligation basis. You only pay when proceeding with

implementation. All training documentation is provided in electronic format for easy, customer-driven downstream training. There is a fully inclusive telephone support help desk, remote assistance and upgrades within the monthly payment plan.

### Applications/Products

Manufacturing management: 123insight is an advanced manufacturing enterprise management system: a true .Net software application based on Microsoft's SQL, delivering simplicity for day-to-day operational use. It is everything that you would expect, from initial estimates and quotes, through sales and purchasing, full stock and manufacturing control, despatch, invoicing with accounts integration and interfacing options, as well as CRM+. CRM+ in 123insight terms is more than managing client or customer relationships; it is an entire 'communications' and 'workflow' capability that can streamline and control all business processes and procedures including stores scanning, along with service and repair.

## case study

Eco-Burner, based in Waterford, Ireland, manufactures the Chafo burner. After the company received investment, they knew that they had to replace their Excel spreadsheets and Sage 50 accounts software if they were to achieve their desired growth.

In the four years since installing 123insight the company has seen an 800%

increase in turnover – without the need for any more admin staff – and they've created their own shop floor user interface, which knits tightly in with 123insight using the SDK.

The company uses 123insight to conform to international gas safety standards, including ISO:9000 and ETL.

They have also benefited from CRM+ and

Access Dimensions Accounts, along with automatic report generation through Crystal Reports.

123 Insight Ltd won the prestigious IT Europa SME Solution of the Year award in March 2017 as a result of the implementation of the software at Eco-Burner.

# The no-risk approach to MRP/ERP

**All the success - none of the risk**

If you need to implement or replace an MRP/ERP system why go through the expensive traditional selection approach of paying for a system before you know it'll suit your needs.

With 123insight there's no risk. Attend a free Evaluation Workshop, held around the country each month. If you think the system is a good fit then attend the six days of **No Obligation** training, on the understanding that if you decide not to move forward you walk away with nothing to pay. After that it's a low monthly subscription with no minimum tie-in period.
