

## Rented MRP catches on

MRP provided as a service will be the star of Rent IT Systems' stand. Visitors might be surprised to find how low-cost, low risk this is – with no contract and no minimum period.

This firm has been quietly and successfully providing what used to be called ASP (application service provider) facilities in terms of MRP.

Automotive and aerospace pipe assemblies manufacturer Freeman & Proctor, for example, found that "123MRP did everything we wanted it to do and there was no massive up-front cost," according to Phil Boffin, its commercial manager.

"Also, the speed at which we were able to implement the system ourselves was impressive – we were live in under four weeks."
