Company Profile

UK Offices: Southampton
Activities: 123mrp.Net was conceived as a direct response to the flaws inherent in the traditional selling and implementation methods characterised by modular MRP/ERP systems. It eliminates the high risk of failure associated with traditional production management systems, setting new standards in usability and capability. 123mrp.Net is provided on a no-commitment, monthly payment plan.
Dealers/VARS/Systems Integrators: Principally direct but dealers and business alliances are being established across UK, Europe and the rest of the world – enquiries welcome.

Industrial Sectors

All manufacturing types and styles and industrial sectors, including aerospace, automotive, engineering, electronics, textiles, food, medical, plastics, furniture, packaging, oil, water, defence, subcontract engineering and subcontract electronics.

Users Profile

Customer profiles range from four to 800+ staff in size, including one-off, small batch, high volume repetitive, make-to-stock, engineer-to-order and make-to-order, process, discrete, subcontract and capital equipment – and with any combination.

1 23mrp.Net is a unique business proposition, designed to address the flaws inherent in the traditional systems supply methods – the system is provided for a low monthly rental fee, with no contract and no penalties.

The system is supplied complete, not modular, with published, transparent pricing. Free monthly evaluation workshops are held across the UK to allow you to check the suitability of our product. Once you are satisfied, you simply register, receive the software and attend training – only five days is needed, including implementation planning, system administration and legacy data transfer.

Guy Amoroso, Managing Director

Rather than be drawn into a lengthy evaluation process with other systems that can cost hundreds of man-hours, many companies decide to try 123mrp.Net. Our low risk approach, guaranteed by our RiskGUARD policy, allows you to be up and running with minimal financial outlay – where customers appreciate that if it doesn't work for them, it doesn't work for us.

Tecan, Components & Technology, Areton International Plastics, Canyon Europe, Flowplant, Image on Food, Freeman & Proctor, Meridian Medical, Percival Aviation.

Services

Industrial Standards: Microsoft .Net architecture; Windows 2000/XP; SQL databases

Training & Support Facilities: Only five days of training required (and no consultancy) for complete implementation. High quality training manuals. All training documentation provided in electronic format for easy,

customer-driven downstream training. Fully inclusive telephone support, remote assistance and upgrades within the monthly payment plan.

Applications/Products

123mrp.Net is an advanced, true .Net software application based on Microsoft's SQL and offers simplicity of use. It is everything that you would expect to find in a manufacturing system, from your initial estimates and quotes, through sales and purchasing, full stock and manufacturing control, despatch, invoicing with accounts integration and interfacing options.

case study

When faced with a £30k ERP upgrade bill, Nuneaton-based pipe and assemblies manufacturer Freeman & Proctor, which serves the aerospace and automotive sectors, chose instead to go for rented MRP software.

Says commercial manager Phil Boffin: "123mrp.Net was the first system we looked at. It did everything we wanted

and there was no massive up-front cost. Also the speed at which we were able to implement the system ourselves was impressive. We were live in under four weeks.

"123mrp.Net has been instrumental in reducing the lead time throughout all departments – from order entry, planning right through to invoicing.

With data entry across all departments seeing improvements of around 50%, this is saving us several man-hours in each department per month. We estimate overall lead-time reductions of between 10% and 20%"

Freeman and Proctor's 28-user 123mrp.Net was live in 19 days at an implementation cost of £4,700.
