

Rent-I.T. adds accounting to MRP rental product portfolio

Rent-I.T. Systems UK has partnered with Access Accounting Ltd to offer the Access Accounts product alongside its I23MRP software on a monthly payment plan.

I23MRP is supplied under Rent-I.T.'s RiskGUARD+ plan - a low, monthly payment per user plan, which can be changed or cancelled at anytime.

There is no contract to bind and no capital commitment to make, eliminating the need for time-consuming, complicated and uncertain system selection.

Access Accounts is now also supplied using the same pioneering business model

approach, which has proved so successful for Rent-I.T. Systems with its I23MRP.

Access Dimensions is targeted at medium to large organisations that feel that they have outgrown some of the older, mid-range offerings. It offers stability and a growth path by virtue of its use of the SQL database or MSDE (Microsoft SQL Desktop Edition).

Dimensions offers sophisticated, multi-currency functionality, with multiple exchange rate, foreign currency sales, purchase and nominal accounts, bank accounts in currency, as well as handling Intrastats.
